

MINISTRY OF FOREIGN AFFAIRS AND TRADE

Information note on freight traffic and transit traffic:

The decision that allows freight traffic crossing through Hungary unhindered, but under strict oversight, ensures the continuous supply of the Hungarian people.

Those freight carriers that are bound for Hungary, bringing goods to the Hungarian people, play a crucial role.

Freight carriers with the destination beyond Hungary may enter, but under strict safety conditions, and are only allowed to use highway routes and fuel stations designated for this purpose. This is allowed continuously.

Regarding foreign citizens wishing to enter Hungary **from Austria and Slovenia, citizens of the neighboring countries and Bulgaria** may also transit through Hungary. The condition of their entry is the assurance of the exit, which means we require an approval from the neighboring countries to admit the people wishing transit through Hungary. Citizens of the countries concerned can use the designated transit corridors from 9 PM to 5 AM.
